

Carvill Consulting

Facilities and Safety Consulting Services

Dealing with multiple vendors to set up your office or trying to decipher complicated requirements for your new build-out is a burden on your resources. You need the job done right, on time, and on budget. You need a team player who has operating company experience and knowledge of the time- and resource-critical nature of your projects.

You need Carvill Consulting. We offer a comprehensive, focused approach to accomplishing your objectives, whether you have a full project or just need advice on next steps. We provide quality service to companies in various stages of development, specializing in the semiconductor and life sciences markets.

- > Early-stage—Office and lab layout and design, cleanrooms, IT/telecommunications setup, equipment installations, lab safety program.
- > Growth/Expansion—Construction project management, lease negotiations, permitting, short and long term space planning.

Carvill Consulting is committed to maximizing your results and stretching your cash. We listen to your needs and only work with top-tier vendors to ensure each and every project is completed to your satisfaction.

Laurie Carvill, principal of Carvill Consulting, is a graduate of Cornell University, holding a Masters and Bachelors degree in Operations Research and Industrial Engineering. She has hands-on facilities, safety, and manufacturing experience from industry giants such as Hewlett-Packard's semiconductor division and Agilent Technologies' Bioscience Group, and start-ups, including Fluidigm Corporation. As an owner's representative, Laurie has managed millions of dollars in construction projects in the high tech environment.
